Full stack development MERN Practical

Practical – 1

Roll No.: T050	Name: AASHU YADAV
Class: TYIT	Batch: 1
Date of Assignment: 27/06/2026	Date/Time of Submission: 27/06/2026

Aim:-

1.Environment Setup and JavaScript Basics

a. Install Node.js and Visual Studio Code, and verify installation.

```
PROBLEMS  OUTPUT  DEBUG CONSOLE  TERMINAL
● PS C:\Users\itlab\Desktop\TYIT Aashu MERN> node -v
v24.17.0
● PS C:\Users\itlab\Desktop\TYIT Aashu MERN> npm -v
11.13.0
○ PS C:\Users\itlab\Desktop\TYIT Aashu MERN> |
```

b. Create a simple Node.js file and run it using the terminal.

Code:-

```
console.log("Hello,Welcome to 1st Practical of MERN");
console.log("Aashu ");
```

Output:-

```
● PS C:\Users\itlab\Desktop\TYIT Aashu MERN> node pract1B.js
Hello,Welcome to 1st Practical of MERN
Aashu
```

c. Write a Node.js script demonstrating basic JavaScript commands (console log, variables, and arithmetic operations).

Code:-

```
let num1 =20;
let num2 =10;
console.log("Addition ",num1+num2 );
console.log("Subtraction ",num1-num2 );
console.log("Multiplication ",num1*num2 );
console.log("Division",num1/num2 );
console.log("Aashu YAdav ");
```

Output:-

```
PS C:\Users\itlab\Desktop\TYIT Aashu MERN> node pract1C.js
Addition 30
Subtraction 10
Multiplication 200
Division 2
Aashu YAdav
```

d. Create and run a simple program using variables and functions.

Code:-

```
let num1 = 20;
let num2 = 10;
function Addition(a,b) {
    return a+b;
}
function Multiplication(a,b) {
    return a*b;
}
console.log("Addition=", Addition(num1,num2));
console.log("Multiplication=", Multiplication(num1,num2));
console.log("Aashu ")
```

Output:-

```
PS C:\Users\itlab\Desktop\TYIT Aashu MERN> node pract1D.js
Addition= 30
Multiplication= 200
Aashu
```

e. Demonstrate use of operators and control statements in JavaScript

Code:-

```
let num = 20;
let num1 = 10;

console.log("num > num1 :", num > num1);
console.log("num < num1 :", num < num1);
console.log("num == num1 :", num == num1);
console.log("num != num1 :", num != num1);

if (num > num1) {
    console.log("num is greater than num1");
}
else {
    console.log("num1 is greater than num");
}

console.log("Switch Statement");
let day = 2;
```

```

switch (day){
    case 1:
        console.log("Monday");
        break;
    case 2:
        console.log("Tuesday");
        break;
    default:
        console.log("Invailid day");
}

```

Output:-

```

num > num1 : true
num < num1 : false
num == num1 : false
num != num1 : true
num is greater than num1
Switch Statement
Tuesday
Aashu yadav

```

f. Write programs using loops and template literals.

code:-

```

let number = 5;
console.log(`Multiplication table of ${number}`);

for(let i = 1; i <= 10; i++)
console.log(`${number} x ${i} = ${number * i}`);

```

Output:

```

PS C:\Users\itlab\Desktop\T051> node pract1f.js
Multiplication table of 5
5 x 1 = 5
5 x 2 = 10
5 x 3 = 15
5 x 4 = 20
5 x 5 = 25
5 x 6 = 30
5 x 7 = 35
5 x 8 = 40
5 x 9 = 45
5 x 10 = 50

```
