Roll No.: T050	Name: AASHU YADAV
Class: TYIT	Batch: 1
Date of Assignment: 20/08/2026	Date/Time of Submission: 20/08/2026

Create a React-based Product Store Interface that fetches product details from an online API. Display the products as cards containing the product image, name, and price. Implement a search facility that filters the products dynamically based on the product name entered by the user.

Code:-

```
import axios from "axios";
import { useEffect, useState } from "react";

function App() {
  const [products, setProducts] = useState([]);
  const [search, setSearch] = useState("");

  // Fetch products from API
  useEffect(() => {
    axios
      .get("https://fakestoreapi.com/products")
      .then((response) => {
        setProducts(response.data);
      })
      .catch((error) => {
        console.log("Error fetching products:", error);
      });
  }, []);

  // Filter products based on search
  const filteredProducts = products.filter((product) =>
    product.title.toLowerCase().includes(search.toLowerCase())
  );

  return (
    <div style={styles.container}>
      <h1>Product Store</h1>

      <input
        type="text"
        placeholder="Search products..."
        value={search}
        onChange={(e) => setSearch(e.target.value)}
        style={styles.search}
      />

      <div style={styles.productContainer}>
        {filteredProducts.map((product) => (
```

```

    <div key={product.id} style={styles.card}>
      <img
        src={product.image}
        alt={product.title}
        style={styles.image}
      />

      <h3>{product.title}</h3>

      <p>Price: ${product.price}</p>
    </div>
  )))
</div>
</div>
);
}

```

```

const styles = {
  container: {
    textAlign: "center",
    padding: "20px",
    fontFamily: "Arial",
  },

  search: {
    width: "300px",
    padding: "10px",
    marginBottom: "30px",
    fontSize: "16px",
  },

  productContainer: {
    display: "flex",
    flexWrap: "wrap",
    justifyContent: "center",
    gap: "20px",
  },

  card: {
    width: "220px",
    padding: "15px",
    border: "1px solid #ddd",
    borderRadius: "10px",
    boxShadow: "0 2px 8px rgba(0,0,0,0.1)",
  },

  image: {
    width: "150px",
    height: "180px",
    objectFit: "contain",
  },
};

```

export default App;

Output:-
