Technology (B.Sc.I.T Semester V)

Full stack development MERN Practical
Practical – 4

Roll No.: T050	Name: AASHU YADAV
Class: TYIT	Batch: 1
Date of Assignment: 25/07/2026	Date/Time of Submission: 25/07/2026

Aim:- React components ,props and sate

b. Pass data between components using props

Code:-

App.jsx

```
import Header from "../components/Header";
import Footer from "../components/Footer";
import HotalCard from "../components/HotalCard";
function App() {
  return (
    <div>
      <Header />
      <HotalCard
        restaurant="Domino's Pizza"
        food="Farmhouse Pizza"
        price={299}
        discount={10}
        rating={4.4}
      />
      <Footer />
    </div>
  );
}
```

export default App;

Header.jsx

```
function Header(){
  return(
    <div>
      <h1>Online food Delivery Deshboard</h1>
      <hr/>
    </div>
  );
}
```

export default Header;

Footer.jsx

```
function Footer() {
  return (
    <div>
      <hr />
      <h3>© 2026 Food Delivery App</h3>
      <h3>Aashu Yadav </h3>
    </div>
  );
}
```

export default Footer;

HotalCard.jsx

```
function HotalCard(props) {
  const discount = (props.price * props.discount) / 100;
  const finalPrice = props.price - discount;
  return (
```

Aashu Yadav
T050

```
<div>
  <h2>{props.restaurant}</h2>
  <p>Food Item: {props.food}</p>
  <p>Original Price: ₹{props.price}</p>
  <p>Discount: {props.discount}%</p>
  <p>Discount Amount: ₹{discount}</p>
  <p><b>Final Price: ₹{finalPrice}</b></p>
  <p>Rating: {props.rating}</p>
  <hr />
</div>
);
}
export default HotalCard;
```

Output:-

Online food Delivery Deshboard

Domino's Pizza
Food Item: Farmhouse Pizza
Original Price: ₹299
Discount: 10%
Discount Amount: ₹29.9
Final Price: ₹269.1
Rating: 4.4

© 2026 Food Delivery App

c. Use the useState hook to manage and update data.

Code:-

App.jsx

```
import { useState } from "react";
function App() {
  const[ count,setCount]=useState(0);
  return(
    <div>
      <h1>Button Click Counter</h1>
      <hr/>
      <h2> User Click :{count} Times</h2>
      <button onClick={() => setCount(count+1)} >Click here </button>
      <h2>Aashu Yadav</h2>
    </div>
  );
}
export default App;
```

Output:-

Button Click Counter

User Click :4Times

Click here

Aashu Yadav

d. Create a form component to accept user input and display it Dynamically.

Code:-

App.jsx

```
import StudentForm from "../components/StudentForm";
function App() {
  return (
    <div>
      <StudentForm />
    </div>
  );
}
```

Aashu Yadav
T050

```
);
}
export default App;
StudentForm.jsx
import { useState } from "react";
function StudentForm() {
  const [name, setName] = useState("");
  const [rollNo, setRoll] = useState("");
  const [branch, setBranch] = useState("");
  const [cgpa, setCGPA] = useState("");

  return (
    <div>
      <h2>Student Registration Form</h2>
      <hr />
      <label>Name:</label>
      <input
        type="text"
        placeholder="Enter Your Name"
        value={name}
        onChange={(e) => setName(e.target.value)}
      />
      <br /><br />
      <label>Roll No:</label>
      <input
        type="number"
        placeholder="Enter Your Roll No"
        value={rollNo}
        onChange={(e) => setRoll(e.target.value)}
      />
      <br /><br />
      <label>Branch:</label>
      <input
        type="text"
        placeholder="Enter Your Branch"
        value={branch}
        onChange={(e) => setBranch(e.target.value)}
      />
      <br /><br />
      <label>CGPA:</label>
      <input
        type="number"
        step="0.01"
        placeholder="Enter CGPA"
        value={cgpa}
        onChange={(e) => setCGPA(e.target.value)}
      />
      <hr />
      <h2>Student Details</h2>
      <p>Name: {name}</p>
      <p>Roll Number: {rollNo}</p>
      <p>Branch: {branch}</p>
      <p>CGPA: {cgpa}</p>
    </div>
  );
}
export default StudentForm;
Output:-
```

Aashu Yadav
T050

Student Registration Form

Name:

Roll No:

Branch:

CGPA:

Student Details

Name: Aashu
Roll Number: 50
Branch: IT
CGPA: 8

e. Display a list of items stored in the state using map().

Code:-

App.jsx

```
import { useState } from "react";
function App() {
  const [subjects, setSubjects] = useState([
    "React JS",
    "Node JS",
    "Express JS",
    "MongoDB",
    "JavaScript"
  ]);
  const [newSubject, setNewSubject] = useState("");
  const addSubject = () => {
    if (newSubject.trim() === "") return;
    setSubjects([...subjects, newSubject]);
    setNewSubject("");
  };
  return (
    <div style={{ padding: "20px" }}>
      <h1>Subjects List</h1>
      <hr />
      <input
        type="text"
        placeholder="Enter Subject"
        value={newSubject}
        onChange={(e) => setNewSubject(e.target.value)}
      />
      <button onClick={addSubject}>Add Subject</button>
      <ul>
        {subjects.map((subject, index) => (
          <li key={index}>{subject}</li>
        ))}
      </ul>
      <h3>Aashu Yadav</h3>
    </div>
  );
}
export default App;
```

Output:-

Subjects List

React JS
Node JS
Express JS
MongoDB
JavaScript
AI
EJ

Aashu Yadav T050

f. Build a small interactive component (e.g., counter or to-do list).

counter

Code:-

App.jsx

```
import { useState } from "react";
function App() {
  // State Variable
  const [count, setCount] = useState(0);
  // Function to decrease count
  const handleDecrease = () => {
    if (count > 0) {
      setCount(count - 1);
    } else {
      setCount(0);
    }
  };
  return (
    <div>
      <h1>Button Click Counter</h1>
      <hr />
    </div>
  );
}
```

Output:-

Button Click Counter

Aashu Clicks: 1 Times

Increase Decrease Reset

to-do list

Code:-

App.jsx

```
import { useState } from "react";
function App() {
  const [task, setTask] = useState("");
  const [tasks, setTasks] = useState([]);
  // Add Task
  const addTask = () => {
    if (task.trim() !== "") {
      setTasks([...tasks, task]);
      setTask("");
    }
  };
  // Delete Task
  const deleteTask = (index) => {
    const newTasks = tasks.filter((_, i) => i !== index);
    setTasks(newTasks);
  };
  return (
    <div>
      <h1>To-Do List</h1>
      <hr />
      <input

```

output:-

To-Do List

Enter Task Add

Go for Exercise

```
<h2>Aashu Clicks: {count} Times</h2>
<button onClick={() => setCount(count + 1)}>
  Increase
</button>
<button onClick={handleDecrease}>
  Decrease
</button>
<button onClick={() => setCount(0)}>
  Reset
</button>
</div>
);
}
export default App;
```

Button Click Counter

Aashu Clicks: 0 Times

Increase Decrease Reset

```
type="text"
placeholder="Enter Task"
value={task}
onChange={(e) => setTask(e.target.value)}
/>
<button onClick={addTask}>Add</button>
<ul>
  {tasks.map((item, index) => (
    <li key={index}>
      {item}
      <button onClick={() => deleteTask(index)}>
        Delete
      </button>
    </li>
  ))}
</ul>
</div>
);
}
export default App;
```
